

Third International Symposium on *FLAC* and *FLAC3D* Numerical Modelling in Geomechanics

October 21-24, 2003

organized by **Itasca Consulting Canada Inc.**

Proceedings Contents

Constitutive Models

Compensation grouting analysis with *FLAC*^{3D}

X. Borrás, B. Celada, P. Varona & M. Senís

An automated procedure for 3-dimensional mesh generation

A.K. Chugh & T.D. Stark

A new constitutive model based on the Hoek-Brown criterion

P. Cundall, C. Carranza-Torres & R. Hart

A study of compaction band formation with the Double-Yield model

C. Detournay, P. Cundall & J. Parra

A new viscoplastic model for rocks: Application to the Mine-by-Test of AECL-URL

F. Laigle

Prediction of deformations induced by tunneling using a time-dependent model

A. Purwodihardjo & B. Cambou

Modeling of anhydrite swelling with *FLAC*

J.M. Rodríguez-Ortiz, P. Varona & P. Velasco

Scenario testing of fluid-flow and deformation during mineralization: from simple to complex geometries

P.M. Schaub, A. Ord & G.H. German

Constitutive models for rock mass: numerical implementation, verification and validation

M. Souley, K. Su, M. Ghoreychi & G. Armand

Slope Stability

A parameteric study of slope stability under circular failure condition by a numerical method

M. Aksoy & G. Once

Numerical modeling of seepage-induced liquefaction and slope failure

A. Bastani & B.L. Kutter

Complex geology slope stability analysis by shear strength reduction

M. Cala & J. Flisiak

Analysis of hydraulic fracture risk in a zoned dam with *FLAC*^{3D}

C. Peybernes

Mesh geometry effects on slope stability calculation by *FLAC* strength reduction method - linear and non-linear failure criteria

R. Shukha & R. Baker

3D slope stability analysis at Boinás East gold mine

A. Varela Suárez & L.I. Alonso González

Underground Cavity Design

The effect of tunnel inclination and "k" ratio on the behavior of surrounding rock mass

M. Iphar, M. Aksoy, M. Yavuz & G. Once

Numerical analysis of the volume loss influence on building during tunnel excavation

O. Jenck & D. Dias

Application of *FLAC*^{3D} on HLW underground repository concept development

S. Kwon, J.H. Park, J.W. Choi & W.J. Cho

Numerical simulation of radial bolting: Application to the Tartaguille railway tunnel

F. Laigle & A. Saïtta

Recent experiences of the prediction of tunneling induced ground movements

C. Pound & J.P. Beveridge

Numerical modeling of remedial measures in a failed tunnel

Y. Sun & P.J.N. Pells

Mining Applications

Sill pillar design at the Niobec mine using *FLAC*^{3D}

P. Frenette & R. Corthésy

Stability analyses of undermined sill mats for base metal mining

R.K. Brummer, P.P. Andrieux & C.P. O'Connor

FLAC numerical simulations of tunneling through paste backfill at Brunswick Mine

P. Andrieux, R. Brummer, A. Mortazavi, B. Simser & P. George

FLAC^{3D} numerical simulations of ore pillars at Laronde Mine

R.K. Brummer, C.P. O'Connor, J. Bastien, L. Bourguignon & A. Cossette

Modeling arching effects in narrow backfilled stopes with *FLAC*

L. Li, M. Aubertin, B. Bussière, T. Belem & R. Simon

FLAC^{3D} numerical simulations of deep mining at Laronde Mine

C.P. O'Connor, R.K. Brummer, P.P. Andrieux, R. Emond & B. McLaughlin

Three-dimensional strain softening modeling of deep longwall coal mine layouts

S. Badr, U. Ozbay, S. Kieffer & M. Salamon

FISH functions for *FLAC*^{3D} analyses of irregular narrow vein mining

H. Zhu & P.P. Andrieux

Soil Structure Interaction

A calibrated *FLAC* model for geosynthetic reinforced soil modular block walls at end of construction

K. Hatami, R.J. Bathurst & T. Allen

Three-dimensional modeling of an excavation adjacent to a major structure

J. P. Hsi & M.A. Coulthard

Pile installation using *FLAC*

A. Klar & I. Einav

Axial tension development in the liner of a proposed Cedar Hills regional municipal solid waste landfill expansion

F. Ma

The usability analyses of HDPE leachate collection pipes in a solid waste landfill

F. Ma

FLAC numerical simulations of the behavior of a spray-on liner for rock support
C.P. O'Connor, R.K. Brummer, G. Swan & G. Doyle

A numerical study of the influence of piles in the passive zone of embedded retaining walls

T.Y. Yap & C. Pound

Dynamic and Thermal Analysis

A practice oriented modified linear elastic constitutive model for fire loads and its application in tunnel construction

E. Abazovic & A. Amon

Seismic liquefaction: centrifuge and numerical modeling

P.M. Byrne, M. Beaty & S.S. Park

Modeling the dynamic response of cantilever earth-retaining walls using *FLAC*

R.A. Green & R.M. Ebeling
